

AUDI A6 ESTATE 1998 – 2005 – our ref: H0312

MESH Safety Net Cassette IN or REMOVED?

Net Cassette identification

LOAD SAFETY NET Cassette is fixed to the back of the rear passenger seats.

Net Cassette **IN**

The Bootliner panel that sits against the back of the seats finishes just under the cassette and fixes to the under face of it – you can **NOT remove** the cassette whilst the liner is in place.

OR

Net Cassette **OUT**

The Bootliner panel that sits against the back of the seats continues up to the top of the seat height and fixes to the head rest post – you cannot **USE** the cassette whilst the liner is in place.

*Do not confuse with the
Load Cover Cassette.*

Very similar to a Roller Blind also located behind the rear passenger seats: The Cassette contains a cover that can be pulled across the load area to hide the contents. The Bootliner will accommodate the load cover cassette
